Experience

02.2022 – Present, Test Engineer Team Leader in Boekestijn Transport Service

- Lead testing processes, including specification and documentation development for test scenarios
- Developed and implemented automated testing frameworks using **Cypress** and **Postman**
- Performed bug hunting, debugging, and collaborated closely with developers for rapid issue resolution
- Configured testing environments and managed test databases in **PostgreSQL**
- Analyzed production logs, created reports, and visualized data insights using **pandas**, **numpy**, and **plotly**

About Me

A dedicated R&D specialist with a strong background in automated testing, test creation, and data analysis. I am committed to continuously improving my technical skills, with particular focus on expanding my expertise in **Python** and **SQL**. Known for a positive attitude and adaptability, I thrive in team environments and excel at logical thinking, problem-solving, and integrating quickly into new projects.

Skills

- Proficient in **Cypress** and **Postman**; foundational knowledge of **Selenium**
- Solid understanding of **AGILE** and **SCRUM** methodologies
- Skilled in creating and maintaining technical project documentation
- Advanced **PostgreSQL** database management experience
- Experienced with **Jira** for project and issue tracking
- Strong analytical skills, communicative, and resilient under pressure
